

MS Mid-Mount Mounting Brackets

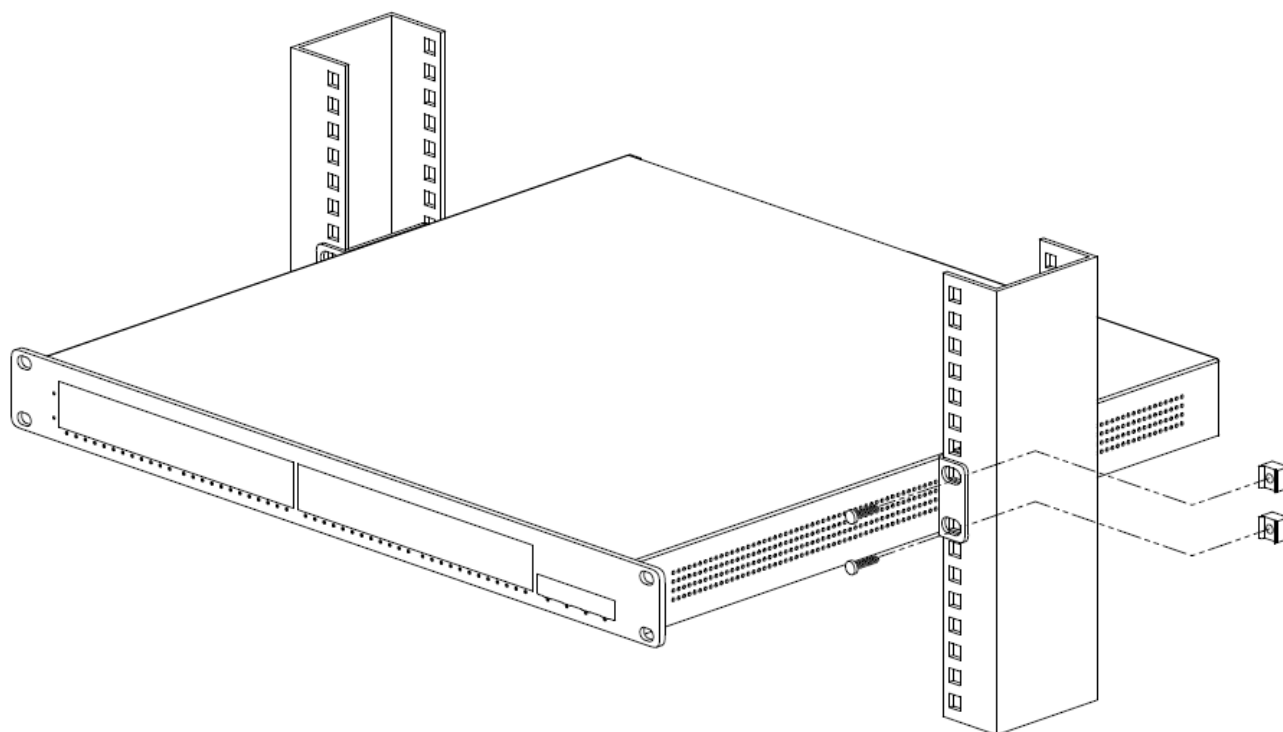

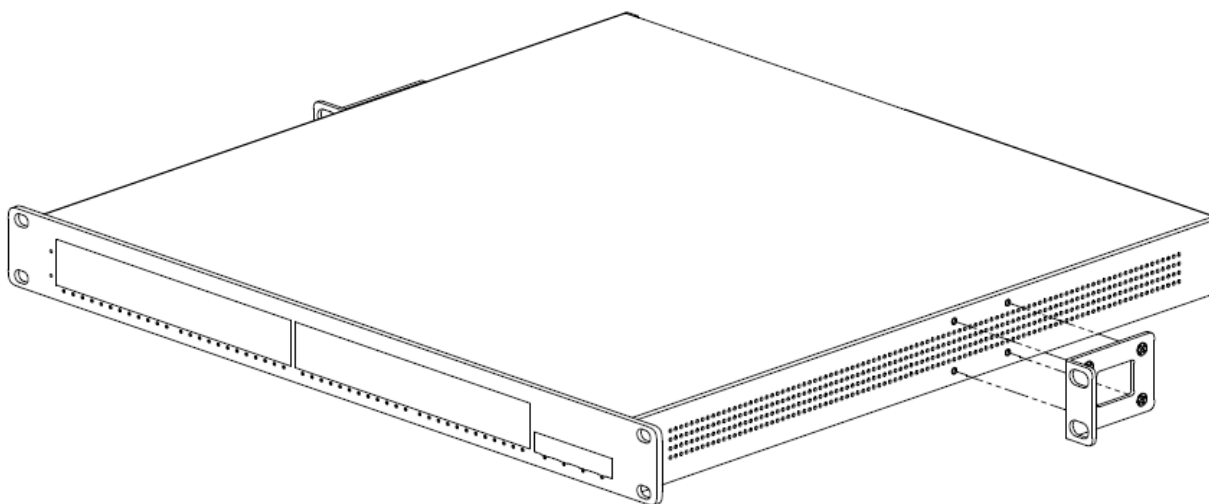

Overview

Meraki sells Mid-Mount mounting brackets which enable certain switch models to be mounted father forward in the rack, which may be helpful for shallow switch racks, or racks that mount switches on both sides with their rear sides facing each other.

Compatible Switch Models

All MS120/125 and MS210/225/250 models (except the 8-port models) are compatible with mid-mount mounting brackets [MA-MNT-MID-1](#).
